

# SEIZURE

European Journal of Epilepsy

## Aims and Scope

**SEIZURE** is an international journal providing a forum for the publication of papers on all topics related to epilepsy and seizure disorders. These topics include the basic sciences related to the condition itself, the differential diagnosis, natural history and epidemiology of seizures, and the investigation and practical management of epilepsy (including drug treatment, neurosurgery and non-medical and behavioural treatments). The journal also reflects the social and psychological burden and impact of epilepsy on the person who has it, his family and society, and the methods and ideas that may help to alleviate such handicaps and stigma as the condition may cause. The aim of the journal is to share and disseminate knowledge between all disciplines that work in the field of epilepsy.

*Seizure is abstracted/indexed by Current Contents Clinical Medicine, CINAHL, EMBASE, Index Medicus, MEDLINE/PubMed, Neuroscience Citation Index, PsychINFO, SciSearch, Scopus, Research Alert and e-psyche.*
