

SEIZURE

European Journal of Epilepsy

Aims and Scope

SEIZURE is an international journal providing a forum for the publication of papers on all topics related to epilepsy and seizure disorders. These topics include the basic sciences related to the condition itself, the differential diagnosis, natural history and epidemiology of seizures, and the investigation and practical management of epilepsy (including drug treatment, neurosurgery and non-medical and behavioural treatments). The journal also reflects the social and psychological burden and impact of epilepsy on the person who has it, his family and society, and the methods and ideas that may help to alleviate such handicaps and stigma as the condition may cause. The aim of the journal is to share and disseminate knowledge between all disciplines that work in the field of epilepsy.

Seizure is abstracted/indexed by Current Contents Clinical Medicine, CINAHL, EMBASE, Index Medicus, MEDLINE/PubMed, Neuroscience Citation Index, PsychINFO, SciSearch, Scopus, Research Alert and e-psyche.

A full Guide for Authors can be found at: <http://www.elsevier.com/locate/seizure>.

Editor-in-Chief

Markus Reuber
Academic Neurology Unit
University of Sheffield
Royal Hallamshire Hospital
Glossop Road
Sheffield, S10 2JF, UK

Associate Editors

Christoph Helmstaedter
(Bonn, Germany)
Weiping Liao
(Guangzhou, China)

Cover acknowledgement:

Frances Lewis has had epilepsy since childhood but wasn't diagnosed until she was an adult. She found being diagnosed with epilepsy a relief. She felt strangely complete. Suddenly Frances made sense. Tortoise brain is a self portrait of her as a child, when she wondered why she was different. With understanding came empowerment.
